## EDUCATION

RENAISSANCE UNIVERSITY B.SC  
MICROBIOLOGY

## PROJECT

The Hackathon challenges is task with solving a community problem. I was in a team of four and we came up with an idea to solve an environmental issue which is waste management. We developed a website called 'recyclr' where individuals are expected to scan a code after dropping waste at appropriate site. I was involved with social media and website content creation.

## PROFILE

I am a design thinking Frontend Developer with over 3 years experience, passionate about all aspect of technology specializing in core frontend technologies planning, coding, testing and maintaining web applications. while constantly challenging myself and learning new skills in IT and frontend development.
